MAK

- Measuring ranges:  
0 ... 10 Nml/min,  
0 ... 50...0...200 NI/min,  
0...300...0...500 NI/min
- Accuracy:  $\pm 1 \dots \pm 1.5 \%$  of full scale
- $p_{\max}$  6 bar;  $t_{\max}$  50 °C
- Connection:  
1/4 ... 1/2" compression fitting;  
1/4" NPT female
- Sensor casing: stainless steel
- Output:  
4 - 20 mA or  
0 - 5 / 1 - 5 V and Modbus
- various gases selectable

**Description**

The new MAK series KOBOLD digital mass flow meter has been specially developed for use in gas measurement, where excellent accuracy, high reliability, robust casing, stainless materials and maximum flexibility are important.

MAK is equipped with an indicator that employs a proven flow sensor. It has a function to indicate the integrated flow rate, in addition to the existing instantaneous flow rate indication.

A model with a flow sensor and precision needle valve in one unit is also available.

**Theory of Operation**

The medium flows through the bypass measuring system. The resulting differential pressure between P1 and P2 causes a small amount of gas to flow through the overhead measuring tube. The separation ratio is constant.

Two resistance temperature detectors (RTD elements) transferring a constant amount of heat to the gas stream are mounted on the measuring tube.

Under flow conditions, the gas molecules absorb and transport the heat away. This gives rise to a temperature difference between the two detector coils, which causes a change in resistance in the detector coils, whereby  $R1 <> R2$ . The electronics converts the signal for indication. The temperature difference increases as the flow increases.

**Special Advantages**

- Direct mass flow measurement
- No pressure or temperature correction needed
- Large measuring range
- Negligible pressure loss
- May be fitted in any position
- High degree of repeatability
- Analogue output 0-5 V<sub>DC</sub>, option 4-20 mA
- The employment of a precision needle valve enables minute flow control and monitoring
- Flow monitoring alarm 2 points output. (2 points each for any flow rate value.)
- Instantaneous flow rate/analog output. (Voltage 0-5 V or 1-5 V or current 4-20 mA), integrated flow rate/pulse output installed.
- Compact and lightweight.
- The flowmeter is equipped with an indicator and can start measurement of flow rates as soon as a 24 V<sub>DC</sub> power supply is connected.
- "Mass flow" enables direct reading of flow rates without a need of troublesome flow rate compensation calculation by temperature/pressure.

**Application Examples**

- Gas monitoring
- Paint lines
- Laminator systems
- Semiconductor industry
- Analysis devices
- Exhaust measurement
- Engineering
- N<sub>2</sub>/O<sub>2</sub> -generators
- Boiler controls

**Measuring tube design**

**Flow diagram**

**Technical Details**

Field of application: suited only for dry, oil-free gases

Housing size:	S	M	L
Accuracy <sup>1)</sup> :	±1 %...F.S. @ 15...35°C		
Applicable gas <sup>2)</sup> :	N <sub>2</sub> (Air, H <sub>2</sub> , He, Ar, O <sub>2</sub> , CO <sub>2</sub> , CH <sub>4</sub> / by N <sub>2</sub> conversion)	N <sub>2</sub> (Air, Ar/ by N <sub>2</sub> conversion)	N <sub>2</sub> (Air/ by N <sub>2</sub> conversion)
Fitting:	Swagelok® ¼" (Standard)		
Weight (without needle valve):	Approx. 600g	Approx. 700g	Approx. 1000g
Weight (with needle valve):	Approx. 800g	Approx. 1100g	Approx. 1500g

**Temperature**

Operating temperature: 5...50°C  
 Storage temperature: -10...+60°C  
 Operating humidity: 10...90% RH (no condensation)  
 Max. operating pressure: 6 bar  
 Materials of parts in contact with gases: SUS316, SUS316L, PTFE, FKM (op.: NBR, CR)  
 Power supply: 24V<sub>DC</sub> (±10%), max. 100 mA

**Flow rate indication**

Indicator: 4-digit 7-segment LED (Zero blanking)  
 Instantaneous flow rate indication update cycle: 25, 50, 100, 200, 500, 1000 msec (selectable)  
 Low cut function: indication of a value below 1 % F.S. settable to "0"  
 Indication range: When the low cut function is not used; indication limiter flashes at 0–10 % F.S. and at 100–125 % F.S.  
 Integrated flow rate indication range <sup>3)</sup>: 8-digit indication (Max. 99,999,999, indication limiter flashing)  
 The units of indication are the same as the instantaneous flow rate.  
 Digital communication: RS485 (MODBUS RTU), ID:1 ... 247

**External output**

Number of outputs: 2 (Each output selected and set to instantaneous flow rate upper limit, lower limit, upper/lower limit or integrated flow rate reach. 1 point may be integrating pulse.)  
 Inversion of outputs is possible.  
 Output method: NPN open collector (Max. rating: 30V<sub>DC</sub>, 50mA)  
 Integrating pulse output rate: 1 % F.S. ... 100 % F.S./pulse, pulse width: approx. 50ms  
 Alarm indication: LED lamps (OUT1, OUT2) light up when the signal is active  
 Analog output <sup>4)</sup>: 4-20mA (max. load 250 Ω), 1-5V or 0-5V (min. load 10 kΩ)  
 Protection: IP40

**Needle valve part**

Flow adjust knob turning: Approx. 12 turns  
 Materials of parts in contact with gases: SUS303, SUS316, PTFE, FKM (op. NBR, CR)

<sup>1)</sup> The precision is guaranteed for nitrogen gas.  
<sup>2)</sup> The full scale of the selected gas is the same as the full scale of N<sub>2</sub>.  
<sup>3)</sup> The indication of integrated flow rates is for reference. It is held when the power is turned off.  
<sup>4)</sup> The analog output is switchable.

Order Details (example: MAK-M 30 S01 C2 4 A 0)
